Journal of Fluid Mechanics Volume 399 **25 November 1999**

S. B. Dalziel, P. F. Linden & D. L. Youngs	Self-similarity and internal structure of turbulence induced by Rayleigh–Taylor instability	1
A. M. Grillet, A. G. Lee & E. S. G. Shaqfeh	Observations of ribbing instabilities in elastic fluid flows with gravity stabilization	49
M. R. Malik, F. Li, M. M. Choudhari & C.-L. Chang	Secondary instability of crossflow vortices and swept-wing boundary-layer transition	85
T. Jongen & T. B. Gatski	A unified analysis of planar homogeneous turbulence using single-point closure equations	117
A. L. Yarin, G. Brenn, O. Kastner, D. Rensink & C. Tropea	Evaporation of acoustically levitated droplets	151
R. W. Griffiths & A. E. Kiss	Flow regimes in a wide 'sliced-cylinder' model of homogeneous beta-plane circulation	205
C. A. van Duin	The effect of non-uniformity of modulated wavepackets on the mechanism of Benjamin–Feir instability	237
T. Boeck & A. Thess	Bénard–Marangoni convection at low Prandtl number	251
S. W. McCue & L. K. Forbes	Bow and stern flows with constant vorticity	277
M. A. F. Medeiros & M. Gaster	The production of subharmonic waves in the nonlinear evolution of wavepackets in boundary layers	301
Y. Agnon, P. A. Madsen & H. A. Schäffer	A new approach to high-order Boussinesq models	319
J. R. Stocker & D. H. Peregrine	The current-modified nonlinear Schrödinger equation	335
L. de Luca	Experimental investigation of global instability of plane sheet flows	355
CORRIGENDUM		377
BOOK REVIEW		
Ocean Modelling and Parameterization, by E. P. Chassignet & J. Verron		378
INDEX TO VOLUME 399		382
